Education

Vidyavardhini College of Engineering and Technology (VCET) **Expected: 2028**
Bachelor of Engineering in Computer Engineering | CGPA: 8.11/10 *Vasai, Maharashtra*

Technical Skills

Programming Languages	Java, SQL, JavaScript, Python, C
Backend Technologies	Spring Boot, Spring Data JPA, REST APIs, JDBC
Databases	MySQL, PostgreSQL, Redis
Developer Tools	Git, Maven, IntelliJ IDEA, VS Code, Postman, Docker, Linux
Core CS Concepts	Data Structures & Algorithms, OOP, DBMS

Experience

Tata Communications Limited **Summer 2026**
Project Trainee Intern — MOVE Development Team *Mumbai (Vashi), Maharashtra*

- Developed **RESTful APIs** using **Java (Spring Boot)** and **Hibernate/JPA** for enterprise data access across **MySQL** and **Redis**.
- Implemented unit and integration tests using **JUnit** and **Mockito** to validate backend services and API functionality.
- Worked on enterprise MOVE backend services built with **Spring Boot** and **JAX-RS (RESTEasy)**.
- Worked with **Azure DevOps, Jira, Teleena systems**, and enterprise software development workflows.

Projects

LockedIn Browser Extension | *JavaScript, HTML/CSS* | GitHub | Live **Active**
- Developed an open-source browser extension that removes distracting YouTube elements such as Shorts, recommendations, and homepage feeds using DOM manipulation.
- Adopted by **1,000+ active daily users** across Chrome Web Store and Firefox Add-ons.

Canteen Management System | *Java, Spring Boot, PostgreSQL, Postman* | GitHub **2026**
- Developed **REST APIs** using **Spring Boot** for canteen ordering and management operations.
- Designed **PostgreSQL** schemas to manage food inventory, orders, and payment tracking with relational integrity.

IntelliTrail | *Python, FastAPI, Scikit-learn, yfinance, React, Supabase* | GitHub **2026**
- An Autonomous trading platform integrated with **ML-based market prediction (SMA, RSI, ATR)** with adaptive trailing stop-loss optimization.
- Developed multi-ticker trading bots and a **React dashboard** for portfolio visualization, P&L tracking, and secure authentication. Presented at **VNPS National-Level Project Showcase.**

Achievements & Extracurricular

Runner-Up — TCS Tech Day Hackathon 2026 **July 2026**
- Built Verifly, an AI-powered fake internship offer detection platform using LLMs and explainable AI, securing Runner-Up at the 90-minute TCS Tech Day Hackathon.

Committees & Societies **2025 – Present**
- **Computer Society of India (CSI):** As a Deputy Admin Head, responsible for technical event coordination and event-related documentation.
- **Microsoft Learn Student Club (MLSC):** As an App Development Associate, contributing to mobile and web application development for club activities and events.
