Education

Vidyavardhini College of Engineering and Technology (VCET)

Bachelor of Engineering in Computer Engineering | CGPA: 8.11/10

Expected: 2028

Vasai, Maharashtra

Technical Skills

Programming Languages

Java, SQL, JavaScript, Python, C

Backend Technologies

Spring Boot, Spring Data JPA, REST APIs, JAX-RS, JDBC

Databases

MySQL, PostgreSQL, Redis

Developer Tools

Git, Maven, IntelliJ IDEA, VS Code, Postman, Docker, Linux

Core CS Concepts

Data Structures & Algorithms, OOP, DBMS, System Design

Experience

Tata Communications Limited

Summer 2026

Project Trainee Intern — MOVE Development Team

Mumbai (Vashi), Maharashtra

- Developed and enhanced enterprise RESTful APIs for the MOVE platform using Java, Spring Boot and legacy JAX-RS.
- Implemented enterprise authentication by integrating the Access Manager APIs and handling JWT-based authentication for secure downstream API communication.
- Developed JUnit test cases and validated REST APIs using Postman to ensure functionality and reliability across multiple service endpoints.
- Worked with Azure DevOps, Git, Redis, MySQL, Docker, and Azure Kubernetes Service (AKS) as part of enterprise backend development and deployment workflows.

Projects

LockedIn Browser Extension | *JavaScript, HTML/CSS* | [GitHub](#) | [Live](#)

Active

- Developed an open-source browser extension that removes distracting YouTube elements such as Shorts, recommendations, and homepage feeds using DOM manipulation.
- Adopted by 1,000+ active daily users across Chrome Web Store and Firefox Add-ons.

Canteen Management System | *Java, Spring Boot, PostgreSQL, Postman* | [GitHub](#)

2026

- Developed REST APIs using Spring Boot for canteen ordering and management operations.
- Designed PostgreSQL schemas to manage food inventory, orders, and payment tracking with relational integrity.

IntelliTrail | *Python, FastAPI, Scikit-learn, yfinance, React, Supabase* | [GitHub](#)

2026

- An Autonomous trading platform integrated with ML-based market prediction (SMA, RSI, ATR) with adaptive trailing stop-loss optimization.
- Developed multi-ticker trading bots and a React dashboard for portfolio visualization, P&L tracking, and secure authentication. Presented at VNPS National-Level Project Showcase.

Achievements & Extracurricular

Runner-Up — TCS Tech Day Hackathon 2026

July 2026

- Built Verifly, an AI-powered fake internship offer detection platform using LLMs and explainable AI, securing Runner-Up at the 90-minute TCS Tech Day Hackathon.

Committees & Societies

2025 – Present

- **Computer Society of India (CSI):** Admin Team Member responsible for technical event coordination, documentation, and logistics.
- **Microsoft Learn Student Club (MLSC):** App Development Coordinator responsible for organizing workshops, hackathons, and developer community initiatives.
